Radon Test Report

Location: XXXX NE 28th Ave. Portland, OR 97211
Client: XXX X
Start Date: 3-3-09 **End Date:** 3-5-09 **Duration:** 48 hrs. **Device Used:** CRM - 1028

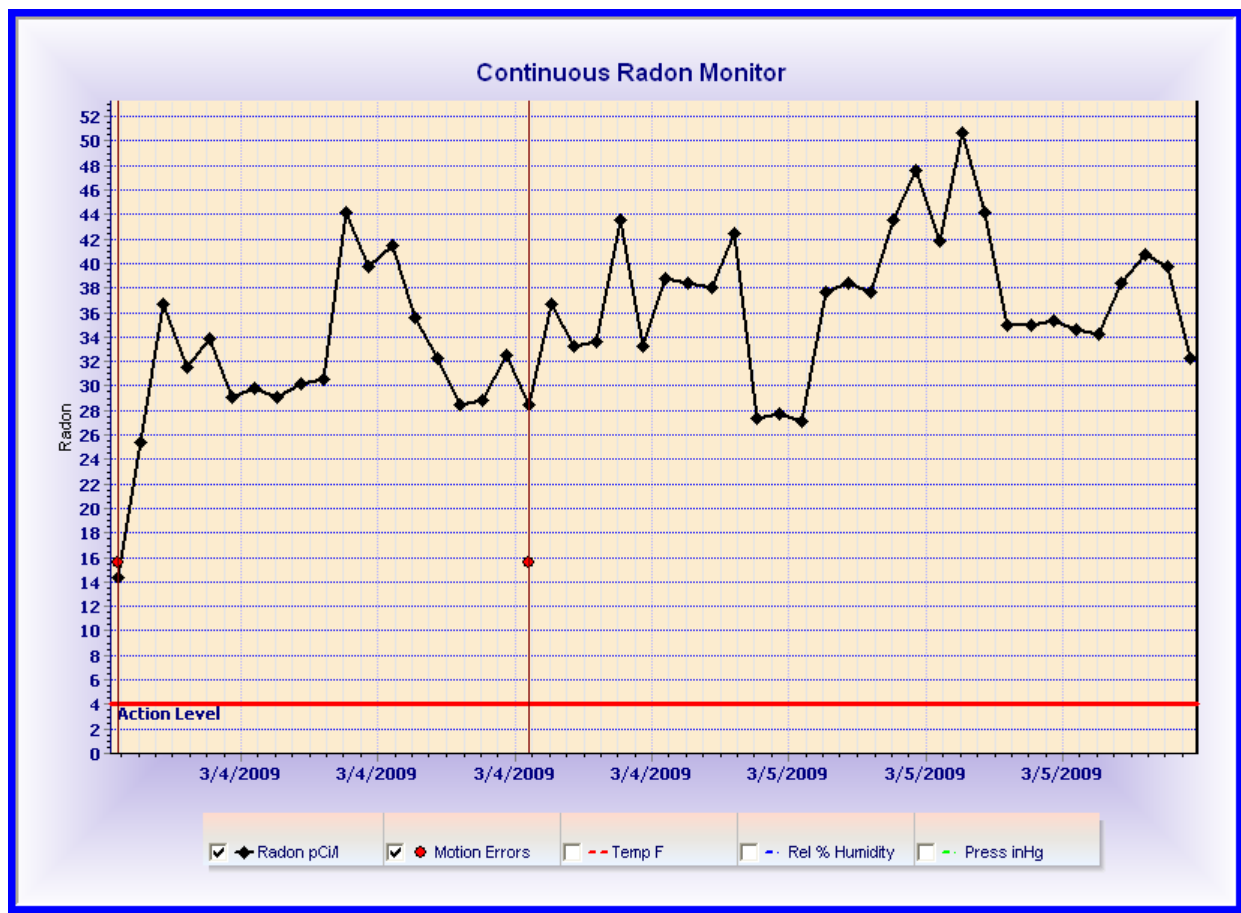

Overall Average: **35.2** pCi/L

EPA Average: **36.6** pCi/L

Recommendation: The radon levels are well above acceptable standards. It is recommended to mitigate the radon levels in this home

The EPA recommended actions per radon levels.

Radon Level	Recommended Action
4 pCi/L or above	Recommend fixing the home
2-4 pCi/L	Consider fixing the home
2 pCi/L or below	Reducing levels below 2 is difficult.
1.3 pCi/L	Average indoor radon level
0.4 pCi/L	Average outdoor radon Level.

While we inform you of the radon levels found, we have to rely on the government agencies that perform the scientific tests and laboratory studies for suggestions of repair. Because there is no known safe level of exposure to radon, with this initial test you can make your own informed decision as to the risks involved. For more information visit www.epa.gov/radon
